To Whom It May Concern:

Re: Saanich Commonwealth Place- Lane Measurements

The competition lanes were measured today using a Leica TC 705 Total Station. Measurements were taken with the bulk head bolted into its normal position and touch pads and lane ropes installed to realize distances between touch pads at the water line at the centre-line of each lane.

The measurements were taken at 1:00 PM and the results are as follows.

Lane Number	Measured Length
1	50.006
2	50.002
3	50.007
4	50.010
5	50.005
6	50.005
7	50.004
8	50.007

All distances are in metres and decimals thereof.

Certified Correct this 2nd day of April, 2013.
